PRISM-4D GLP-1R / Aleniglipron CRO Falsification Handoff

Experimental validation planning for M2 falsification gates

Confidential Discussion Material

Campaign	glp1r_aleniglipron
Release	PRISM_GLP1R_M2_DELIVERABLES_v1.1
Generated (UTC)	2026-05-24T03:47:26Z
Report type	CRO assay routing and falsification gates
CBOM Merkle root	`1461e688bada66c7537bbce30e3b82ab1ec5f214e85cfb7d7ac966c60a7c1856`
Executive archive SHA-256	`b97bf1499fb82b6544c0a50f14e757ceef5e094d00c07f9f8c4633b87b219454`

Use of this document. This package presents computational translational evidence from the PRISM-4D engine and downstream analysis layers. It is *not* a clinical-effect claim, *not* a patient-response prediction, and *not* experimental validation. Assay recommendations are falsification gates, not confirmation ceremonies. PROJECTED and HYPOTHESIZED items require wet-lab falsification before any biological assertion.

Epistemic legend. Every claim, table row, and figure inherits exactly one of the following classes, which governs how it may be cited:

- **OBSERVED** direct tensor measurement from PRISM-4D engine outputs.
- **DERIVED** deterministic transform of observed tensors.
- **INFERRED** multi-tensor interpretation; not a single-tensor measurement.
- **PROJECTED** translational extrapolation beyond simulated conditions.
- **HYPOTHESIZED** requires wet-lab falsification before any biological claim.

---

1 Section 1 — CRO Wet-Lab Action Plan

Each row below is a **falsification gate**. The associated PRISM-4D claim is at risk if and only if the gate fails as described in `falsification_condition`. None of these rows is a biological confirmation request. Priority score is a routing weight, not a probability of success.

2 CRO_WetLab_Action_Plan

PRISM GLP-1R M2 CRO wet-lab action plan. Every row is a **falsification gate**, not a confirmation request. `epistemic_class` column governs how each row may be cited.

3 Section 2 — Claim / Falsification Graph

4 Claim_Falsification_Graph

Claim/falsification graph in flattened edge-table form. `claim_epistemic` is the gate that governs how each edge may be cited. PROJECTED and HYPOTHESIZED edges require wet-lab falsification before any biological assertion.
